

# Regan Swallow Design Ltd.

The versatile first level Great Room with direct vent zero clearance fireplace and cosy window seat allows for smooth seasonal transitions.

The Kitchen's rear eating bar ensures everyone's participation in the chosen activities and creates the illusion of a much larger space. The entire second level is dedicated to the Studio Bedroom and spacious Master Bathroom.

Ten foot vaulted ceilings, two window filled dormers and a covered Balcony makes this a creative and reflective waiting to be experienced environment.

Plans designed with a poured concrete crawl space foundation plan.
