

Regan Swallow Design Ltd.

A six-bedroom lodge easily accommodates and encourages multifamily entertaining. The voluminous Lounge boasts a twenty-foot high open beamed ceiling with a centrally located warming wood stove. The towering front window wall captures all the available views.

Raised above the Lounge floor level but separated only by a railing are the Library and the spacious Dining room. Numerous French door locations access the wrap-a-round multi-level decks for outdoor entertaining.

A staircase hung from the ceiling beams allows access to the second level, where four guest suites share the two full bathrooms. Plans designed with a concrete pier and post foundation plan.
