

Regan Swallow Design Ltd.

Plan 584

First Level 384 sq.ft.
Plan No. 584

Second Level 199 sq.ft.
Plan No. 584

This economical, compact floor plan is perfectly suited for a narrow lot or would minimize the environmental impact of any piece of property.

Even though reduced to bare essentials the living area boasts a two storey high vaulted ceiling. The living area window wall maximizes all the available views and floods the room with natural light.

The sleeping loft shares these same sight lines.

Plans come with a crawl space foundation plan.
